

General description

The instrument test port is simple, efficient and is a cost effective way of allowing easy measurements inside air ducting.

It consists of a Zamac body casting which is internally threaded to accept the plastic plug. Fitted with its sponge gasket, the assembly is airtight.

- Leakproof plug
- Suitable for high velocity systems
- Sponge gasket supplied
- To install with self-drilling screws
- Economical fitting
- Unaffected by most chemicals

Technical specification

- 19 mm (3/4") opening diameter
- Accommodates 25 mm (1") insulation materials

Application
