## **General description**

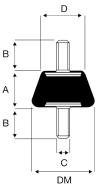

The **Rubber Mounts AG35** and AG45 are rubber-metal vibration absorbers, especially indicated for elastic support of airconditioning units and small machines. They protect the environment against the transmission of vibration, impacts and structural noises. They are easy to install and economical.

The Rubber Mounts AG35 and AG 45 are supplied in packs of 4 called **Instalpack**. They include :

- 4 rubber mounts AG35 or AG45
- 8 nuts M8 zinc coated
- · 8 washers M8 zinc coated

## **Technical specification**

Manufactured in NR (natural rubber) 55°Sh.A

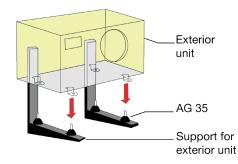

|       | А             | В             | С  | D             | DM            |

AG 35/45

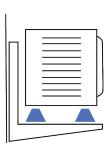

## Assembly

## Application

Exterior air conditioning units

Motors and pumps

- Attach the support to the wall
- Fasten the vibration absorbers to the support
  Mount the unit onto the vibration absorbers
- Attatch the vibration absorbers onto the holes in the unit
